

2. Requirement Analysis Phase :

Functional Requirements :

1. Automatically classify IT tickets based on the issue description.
2. Assign both Category and Subcategory without manual intervention.
3. Support dependent choice logic between Category and Subcategory.
4. Send an automated email notification to the caller upon ticket creation.
5. Store ticket information in a structured and standardized format.
6. Ensure easy maintenance and future scalability.

Non-Functional Requirements :

- Reliability: classification must run on every new ticket.
- Maintainability: keywords can be changed without coding.
- Security: only authorized users can access or modify ticket data.
- Usability: the student only enters Caller and Short Description.
